Questions to Ask Health Care Provider

- What is the medication for and how is it going to help me?

- How and when should I use the medication? How much do I use?

- How long should I use it? Can I stop using the medication or use less if I feel better?

- What should I do if I forget to take the medication or I use too much?

- Will the medication take the place of anything else I am using?

- When will the medication start working? How should I expect to feel?

- Are there any special directions for using the medication?

- Should I avoid any other medications, supplements, drinks, foods, activities, or other things while on this medication?

- Is there anything I should watch for, like allergic reactions or side effects? What do I do if I get any?

- Will I need any tests to check the medication's effects (blood tests, x-rays, other)? When will I need those?

- Do I need to keep this medication in the refrigerator?

- Is there patient information for this medication?
